

# Ezequiel Gatica

Full Stack Developer & Tech Lead

## SUMMARY

---

An inquisitive and curious mind that enjoys facing challenges and transforming ideas into prototypes without sacrificing attention to detail.

My approach is based on user empathy: By understanding the context and needs of the end-user I can then design intuitive and valuable experiences.

I can either take on very autonomous tasks or contribute to large collaborative features while retaining ownership.

I adapt easily to new challenges, constantly researching and applying improvements to my personal projects. I aspire to join teams that value creativity, growth, and real impact.

## WORK EXPERIENCE

---

### Technical Leader @ Kovix

May 2024 - Present

- Promoted to a leadership position within the same project I was a Developer.
- Opened a new development cell with five developers under my charge.
- Working closely with the product team to plan and design future updates and convert feature requests from the operation into new updates.
- Optimizing and optimizing system load in preparation for upcoming massive sales events (Cybermonday, Hot Sale, Black Friday).

### Full Stack Developer @ Kovix

January 2022 - May 2024

- Developer for a Warehouse Management System for Frávega, one of the biggest retailers of electronics in Argentina.
- Streamlined and optimized operations to process thousands of orders per hour, destined for the company's 100+ branches nationwide, 24 hours a day.
- Focused strongly on the system's usability and user experience. Each screen was designed to display relevant information in a compact space.
- Built mocks for external systems to improve local development and testing, emulating service calls without the need of having the actual service.

## EDUCATION

---

### Bachelor of Information Technology @ Universidad de Palermo

2025 - 2027, Buenos Aires, AR

### Systems Analyst @ Instituto Tecnológico ORT

2022 - 2024, Buenos Aires, AR

## CONTACT

---

Saavedra, Buenos Aires, Argentina

## APTITUDES

---

- Strong communication skills
- Rapid learning
- Leadership and Management
- Scripting and internal tools
- Design patterns
- Creative solutions to problems
- Product design and analysis
- Internalization with the product
- Object Oriented Programming

## TECH TOOLS / STACK

---

- NextJS / React
- NestJS / Express
- Typescript / Javascript
- MySQL / PostgreSQL / MongoDB
- TailwindCSS / shadcn-ui
- Sequelize / Prisma
- gRPC / tRPC
- Cypress / Jest
- Vercel v0 / Lovable

## LANGUAGES

---

- Spanish (Native)
- English (C1)
- French (A1)
